

RVF Series

ROOF EXHAUST SMOKEPILL FAN

Roof Exhaust Smokespill Fan – RVF Series

KRUGER

Dimensions

- Vertical discharge roof exhaust smokespill fans are designed for smoke extract and suitable for applications such as general and industrial ventilation, industrial and commercial kitchens, etc.
- Backward curved impellers are made of galvanised sheet steel for sizes 140-400 or painted sheet steel for sizes 450-630.
- Base plates are manufactured from galvanised sheet steel with cowls manufactured from spun aluminium.
- Asynchronous induction motors with squirrel cage rotor in diecast aluminium, IP55 protection with class F insulation.
- Available for single phase and three phase electrical supplier.
- Maximum air stream temperature -40 °C to +120 °C.
- Static and dynamically balanced to ISO 1940 standard.
- Range certified for 400 °C/2 hrs by an independent laboratory.
